Re: Composted Poultry Manure Product

---

In response to your request for the North Okanagan Organic Association's review of your documentation on the above product, I am pleased to forward this letter of endorsement from the NOOA Certification Committee.

The committee reviewed the documentation regarding the temperatures of composting and the inputs in the compost and verified that this product falls within the guidelines stated in the British Columbia Certified Organic Production Operation Policies and Management Standards 3.9 Manure Management: 3.9.2 Allowed: Composted Manure.

With this verification, the producers requesting certification with NOOA are welcome to use this product with no fear of jeopardizing their organic status.

Sincerely,

Cara Nunn  
NOOA Administrator  
Certification Coordinator
